

## Spring Health COVID-19 Antigen Rapid Test Results in 10 minutes using a Nasopharyngeal swab

### Test Details

The Spring Health COVID-19 Antigen Rapid Test is a rapid chromatographic immunoassay for the qualitative detection of COVID-19 antigen in Nasopharyngeal swab. The identification is based on the monoclonal antibodies specific for the Nucleocapsid protein of SARS-CoV-2. It is intended for professional in-vitro diagnostic use only.

### Accurate Results

- Sensitivity: 87.5%
- Specificity: 98.9%
- Accuracy: 98.0%

### Unmatched Convenience

- Visual Results: Easy to interpret.
- Fast Results: 10-minute test time.
- Individual Buffer Vials and Sterile Swabs:  
Helps in testing multiple individuals simultaneously.

## Spring Health COVID-19 Antigen Rapid Test

During the testing process, the extracted specimen reacts with the antibody of the SARS-CoV-2 nucleocapsid protein that are coated onto particles. The mixture migrates into the membrane to react with the antibody for the SARS-CoV-2 nucleocapsid protein on the membrane and will generate one colored line in the test regions. The presence of this colored line in the test regions indicates a positive result. A colored line will always appear in the control region to serve as a procedural control if the test has been performed correctly.

### Test Procedure

### Kit Contains:

- (1) IFU
- (25) Individually pouched Cassettes
- (1) Workstation
- (25) Buffer Tubes
- (25) Sterile Swabs
